

PHILIPPINE GREEN BUILDING COUNCIL

The **PHILGBC** is a non-stock, non-profit organization that **promotes the sharing of knowledge on green building practices** to the industry to ensure a sustainable environment.

The PHILGBC is an alliance of leaders from every sector of the building industry, extensively working at promoting buildings that are environmentally responsible, profitable, safe and healthy places to live, work and play.

The PHILGBC is part of the global network of the World Green Building Council (WorldGBC), a union of National Green Building Councils (GBCs) from around the world. In addition, the PHILGBC works closely with the WorldGBC and the other National GBCs through the Asia-Pacific Regional Network (WorldGBC-APN).

The PHILGBC is an Established Member of the WorldGBC.

For more information, contact the PHILGBC National Secretariat.

Board of Trustees

The multi-sectoral constitution of the PHILGBC Board of Trustees ensures that all **stakeholders in the building and property sector are fully represented.**

The PHILGBC holds elections every year, with annual nominations open to good standing members of the Council.

The members of the Board of Trustees (CY 2023) are:

PROPERTY DEVELOPERS, OWNERS AND BROKERS

Ramon Rufino	Chief Executive Officer, NEO Chair, Board of Trustees, PHILGBC
Marco Antonio de Guzman	Sr. Assistant Vice President, Filinvest Alabang, Inc.
Leilani Kanapi	Vice President and Head – Strategic Procurement, Arthaland Corporation

MANUFACTURERS AND SUPPLIERS

Luis Fernando Chamon	Chief Operating Officer – Construction Products Philippines, Saint-Gobain Philippines Co. Ltd., Inc.
Roel Gonzales	Vice President for Construction, Pioneer Adhesives, Inc.

BUILDING PROFESSIONALS AND SERVICE PROVIDERS

Gener Liwanag	Junior Partner, GF & Partners, Architects Co.
Rowena Ramos	Principal – Sustainability Practice, Ecotektonika, Inc. Vice Chair, Board of Trustees, PHILGBC
Elizabeth Rabuy	Chairman and President, FPD Asia Property Services, Inc. Secretary, Board of Trustees, PHILGBC

CONTRACTORS AND SPECIALTY TRADE CONTRACTORS

Elizabeth Tiu-Mendoza	Managing Director, Monocrete Construction Philippines, Inc. Treasurer, Board of Trustees, PHILGBC
Carlos Pedro Salonga	Senior Vice President and Head of Human Resources and Administration, First Balfour, Inc.

INDIVIDUALS, CIVIL SOCIETY, ACADEME

Araceli Barlam	Head – Mandaue City Environment and Natural Resources, Mandaue City Local Government
Gabriel Ma. Angelo Cascante	Principal Architect, GMaAB Cacante+ Associates
Marlo Ocleasa	Head – City Planning and Development Office, Mandaue City Local Government

For more information, contact the PHILGBC National Secretariat.

Membership

The PHILGBC is a **coalition of leaders from every sector of the building industry**. It is the largest green building initiative in the Philippines with more than 300 Corporate Members and countless people working together in advancing the green building movement in the country.

The membership of the PHILGBC is multi-sectoral, including representatives from developers, property managers, civil society organizations, architects, engineers, material suppliers, contractors, media, lawyers, and building industry consultants.

The PHILGBC welcomes all parties in the growth of the Philippine building sector to be part of the transformation and take the opportunity to help in the development of a more robust green building industry.

PHILGBC SUSTAINING CORPORATE MEMBERS

Calendar Year 2023 As of December 11, 2023

Sustaining Members help the Council in continuing its work in promoting sustainability in the Philippines.

Diamond Member

BERDE

Building for Ecologically Responsive Design Excellence

BERDE is the Philippines' **National Voluntary Green Building Rating System recognized by the Philippine government**, through the Department of Energy (DOE) under the Philippine Energy Efficiency Project – Efficient Building Initiative.

BERDE is a tool to measure, assess, verify and monitor the environmental performance of projects above and beyond existing building and environmental laws, regulations and mandatory standards. This certification enables property market players to benchmark against a single green building rating system.

The development process of **BERDE** is guided by international recognized methodologies for developing standards, and by the Quality Assurance Guide for Green Building Rating Tools (WorldGBC, 2015).

Expanding the scope of **BERDE**, the **BERDE — Districts** was developed to promote the sustainable development of wide-scale projects, and addresses the environmental, social, and economic impacts in the planning and implementation of private communities.

The **BERDE — Districts** rating scheme applies to wide-scale projects that are at the planning or implementation stage. Private commercial estates, residential communities, industrial parks may be certified under the **BERDE — Districts**.

For more information, contact the **BERDE** Program Secretariat.

GREEN BUILDING PROCUREMENT HUB

The Green Building Procurement Hub (*Green Building/PH*) is an online platform to support green building proponents in procuring products, materials, technologies, and services for green building projects. The *Green Building/PH* aims to connect project proponents with like-minded partners in the industry to support green building projects' design, construction, and operations. In addition, the *Green Building/PH* includes green buildings to help proponents on leasing a more sustainable space for personal or business use.

Procure products, services, and building spaces you need for your green building projects through the Green Building Procurement Hub.

The Green Building/PH provides you with a listing of current products, services, and building spaces with green credentials. Easily search through the pages to find the product or service you need for your project, or to find the green building space you need for your company.

For more information, contact the GreenBuilding/PH Program Secretariat.

ANZ/PH

Advancing Net Zero Philippines

The Advancing Net Zero Philippines (ANZ/PH) Program was established and administered by the Philippine Green Building Council (PHILGBC).

Aligned with the global net zero program, we are promoting net zero energy through the Advancing Net Zero Philippines (ANZ/PH) Program. We encourage buildings to reduce their energy consumption through energy conservation and optimization strategies, and use on-site or off-site renewable energy for the remaining operational energy demand of the project.

Net zero energy is the conservation and optimization of the energy use in projects, and the use of the renewable energy for the project's remaining operational energy demand.

Under the Advancing Net Zero Energy Rating Scheme, projects may be certified when they demonstrate a holistic approach to energy performance, through energy efficiency and conservation and the use of renewable energy.

Conserve

Prioritize the conservation of energy using **passive design strategies** to reduce the operational energy demand.

Optimize

Further reduce the operational energy demand using **energy-efficient technologies and strategies**.

Renew

Use **renewable energy** for the reduced operational energy demand of the project.

For more information, contact the ANZ Program Secretariat.

HEALTH+ WELL-BEING

for Buildings Tool

The PHILGBC Health and Well-being for Buildings (H+W) rating tool was formally launched as a tool to support the development of buildings that provide positive benefits to the health and well-being of users. Recognizing the positive benefits that buildings may provide to people and the community, the tool focuses on the interventions of projects and its impact to the project team, employees, and project end users.

H+W serves as a tool to measure, assess, verify and rate the performance of projects above and beyond existing building laws, regulations and mandatory standards, and its performance against social, economic and environmental priorities that affect the health and wellbeing of users.

For more information, contact the Health & Well-being Tool for Buildings Program Secretariat.

Events

PHILGBC events showcase best practices in sustainable development, discuss the latest development on **BERDE**, encourage dialogue between the public and private sectors, and highlights member companies that follow through their commitment to green building.

The PHILGBC events are designed for specific target audiences—from students and professionals to key stakeholders in the private sector and top officials in government. Each event serves as venue to facilitate the exchange of ideas, sharing of experiences and capture the latest movement in the market and the green building sector.

Building Green is the flagship campaign for PHILGBC events, and consists of **year-round activities that encourage the participation in the green building advocacy.**

Building Green events include:

- Government Forum
- CEO Forum
- CEO Breakfast Meetup
- Green Talks
- Product Spotlight
- Annual Conference

For more information, contact the PHILGBC National Secretariat.
